AVAILABILITY

Available immediately for full-time roles.

WORK PREFERENCES

On-site in Wrocław, hybrid or remote.

TECHNICAL SKILLS

LANGUAGES

Python · TypeScript / JavaScript · SQL · C# · Bash

FRONTEND

React 19 · Next.js 14 to 16 (App Router, RSC, Server Actions) · Tailwind CSS · Recharts · Playwright

BACKEND & APIS

FastAPI · Node.js / Fastify · Flask · REST APIs · JWT auth · Prisma · SQLAlchemy / Alembic · pytest

AI ENGINEERING

LLM API integration · Local model inference (Ollama / Qwen) · Prompt design · Structured data extraction · Data enrichment pipelines

TESTING & QUALITY

Playwright E2E tests · pytest · Unit testing · API testing · Code review · CI smoke tests

CLOUD & SECURITY

AWS (S3, DynamoDB, Elastic Beanstalk) · Azure (Sentinel, Logic Apps, KQL) · Zero Trust · SIEM / SOAR · DevSecOps

DATA & DEVOPS

PostgreSQL · MongoDB · Redis · Docker · GitHub Actions CI/CD · Git · Linux · Postman · Agile / Scrum

CREDENTIALS & LANGUAGES

Oracle Cloud Infrastructure 2025 Certified Foundations Associate

Oracle · Jan 2026 · score 93%

English — Advanced (C1)

Turkish — Native

Polish — Elementary (A2)

PROFILE

Final-year software engineering student with full-stack experience across React/Next.js, TypeScript, FastAPI and Node.js, including LLM integration, data enrichment pipelines and AWS/Azure deployments. Completed a six-month software development internship, delivering features for a live B2B SaaS platform and building a second product. OCI Foundations certified (93%). Seeking a full-time software engineering role in Poland or remotely within the EU.

EXPERIENCE

Software Development Intern

Nest2Move Sp. z o.o.

Mar 2026 - Sep 2026 · 6 months · Kraków (remote)

Pro2Move, a B2B procurement SaaS, then PazarPilot, an e-commerce operations panel. Full-stack development within an Agile team. Stack: React · Next.js · TypeScript · Fastify · Prisma · PostgreSQL · Ollama

- Shipped full-stack features across five Pro2Move modules (buyer workspace, approvals, RFP, contracts, vendor governance): the approvals workflow end to end, vendor scorecards, an Apinizer API gateway and DORA ICT-compliance features.
- Implemented JWT authentication (token issuance and login verification), unit-tested the auth middleware, and set up Prisma migrations, seeding and a shared typed API client used across the frontend.
- Designed an LLM data-enrichment pipeline: local Ollama + Qwen on GPU, a secure scraper over about 110 company websites, model-based extraction of industry and market-positioning metadata, synced into PostgreSQL via Prisma.
- From July, developed PazarPilot independently (Next.js 16, TypeScript, Prisma 6, Tailwind 4): one dashboard for Trendyol and Hepsiburada stores with unified listings, merged orders, shelf-level WMS and integration health; a marketplace adapter layer (one five-method interface per platform) and a rule engine for stock, price-mismatch and sync alerts.

SELECTED PROJECTS

PlusEmlak · Real-Estate CRM and AI Marketing SaaS

Frontend owner, three-person team · github.com/Tunaycel/emlakplus-ai-case-study

- Owned the Next.js 16/React 19 frontend: listing and client CRM, dashboards, a typed API client and an AI template studio for branded property visuals. Integrated FastAPI APIs; used Tailwind 4, Recharts and Playwright.

AI Producer Platform · Audio Analysis & Mastering

Working prototype · github.com/Tunaycel/ai-producer-platform

- Built a React/TypeScript and FastAPI prototype with librosa tempo/key analysis and a Pedalboard chain for EQ, compression and limiting.

CVForge · Cloud-Native AI CV Builder

Independent project, deployed on AWS · github.com/Tunaycel/CVForge

- Built a Flask CV builder on AWS Elastic Beanstalk with in-memory PDF generation, S3 pre-signed URLs, DynamoDB persistence (boto3) and ATS keyword scoring.

data-stock · Scan-Based Inventory System

Backend developer, five-person team · github.com/Tunaycel/data-stock-case-study

- Built a FastAPI/PostgreSQL pricing engine with SQLAlchemy 2, Alembic and pytest: date-based discounts, deterministic campaign resolution and soft deletion for auditable price history.

EDUCATION

B.Eng. (inż.) Computer Science · Oct 2023 – Feb 2027

Software Development specialisation, WSB Merito University, Wrocław

Thesis: "Automated Incident Response and Zero Trust Architecture in Cloud Environments: An Implementation on Microsoft Azure", a SOAR pipeline on Sentinel + Logic Apps targeting a 60%+ MTTR reduction.
